

## Hummer

- Hummer is an easy-to-fly, IP54-rated drone for inspection, firefighting, law enforcement, and search and rescue missions. With front collision avoidance, hot-swappable batteries, a 31-minute flight time, Hummer is a reliable drone to fulfill UAV pilots mission demands

|                           | Hummer Drone                     |
|---------------------------|----------------------------------|
| Mechanical Design         | Quadrotor                        |
| Takeoff Weight            | 3290g                            |
| Max Ascent Speed          | 5 m/s                            |
| Max Horizontal Speed      | 18 m/s                           |
| Wind Speed Resistance     | Beaufort scale 5                 |
| Camera Payload            | RGB + thermal; RGB; RGB ZOOM 10x |
| GNSS                      | GPS + Galileo                    |
| Hovering Time             | 30 mins                          |
| Ingress Protection Rating | IP54                             |
| Operation Temperature     | -10°C ~ 40°C                     |
